STATEMENT OF WORK
Product: Back up SIM Card Alarm system housing pool
Monterrey, Nuevo Leon, Mexico
July, 2022

1.0 INTRODUCTION
1.1 The United States Consulate General Monterrey requires to add SIM Cards for the alarm monitoring equipment installed in each residence of the housing pool for backup communication.
1.2 SIM Cards must be installed directly in the different addresses of the housing pools.

2.0 GENERAL REQUIREMENTS
2.1 Contractor must provide the equipment requested and install it according to the SOW specifications.
2.2 The selected vendor must be able to perform this upgrade while maintaining the existing alarm infrastructure in each residence. In addition, the upgrade must allow for alarm notifications to be received at the existing alarm monitoring center.
2.3 The Contractor must be qualified for the job, have verifiable references and own equipment required for the job.
2.4 The personnel of the contractor shall be escorted all the time by RSO workers of the U.S. Consulate.

3.2 What is a SIM Card backup communication?

The SIM Card communicator is a piece of specialized equipment that will be added to the existing alarm control panels installed in each residence of Monterrey’s housing pool. This device will allow for alarm signals to be transmitted via cellular network as opposed to our existing landline notification system. These devices must be compatible with alarm hardware and software currently installed in our residences to maintain RSO’s existing Central Alarm Monitoring System (CAMS).

CAMS installed in each residence are communicating via land line the SIM Card make the communication as a cell phone (cellular network). Having a backup SIM card-based system will go a long way towards making sure we always have residential alarm coverage-be it when there is a gap in the telephone line being paid or if a line gets cut/damaged

3.3 The Vendor shall be responsible for the quality, technical accuracy, and the coordination of all Work and services furnished under this order.

3.4 The Vendor shall verify that all a SIM Cards, related equipment, and systems provide operational dependability.

3.5 The U.S. Consulate Monterrey will provide the addresses of the different residences of the Housing Pool to the Vendor, so it can deliver the SIM Cards in each.

3.6 The Vendor shall provide a signed warranty of two (2) years on the product defects after installation is completed; including any damage to US Consulate property, defective material and improper workmanship on any material provided in this purchase order.

4.0 Delivery Location and Time

4.1 The Contractor shall deliver all ordered items and install it in each residence where they are monitoring our alarm system equipment of the housing pool.

4.2 The installation will be required as we needed based on the available from each resident, this will be no more than 2 months after the orders had been approved.
