UNDERSTANDING BRANDING

When you’re thinking about finding new customers for your business or new supporters for your organization, you probably know that marketing is a key tool to get your name recognized and differentiate you from competitors. Let’s explore what branding means for your business.

Branding is the essential process of identifying, creating, and managing your company’s image, and it is what sets you apart from your competitors. Branding is what links all of your efforts together, and marketing is an essential component in your branding toolbox.

Brand Identity

- **Brand**: The feel and perception of your company that the rest of the world sees.
- **Branding**: The continual process of identifying, creating, and managing your company’s image.
- **Brand identity**:
  - The visual components of your brand.
  - Your brand voice.
  - Your brand values.
  - Your brand personality.
  - Your unique brand positioning.

Understanding your target market, your competitors, and differentiating your company from others through the following exercises will help you to translate your story into a more established brand identity.

Remember: Your Brand Matters

Your brand is going to be the reputation of your organization. It is how you communicate to others what you are, what you do, and what you believe. It can also create a lasting impression. You want to aim to have a unique, authentic, clear, and consistent brand that will leave a positive impression on those who interact with you. It should also lead to more individuals wanting to interact with you, support you, and buy from you.
Brand Positioning

Brand positioning is the process of putting your brand in the mind of your customers and organization supporters. Strong brand positioning shows what differentiates your business or organization from your competitors in a meaningful way. Brands commonly create strategies for their brands based on such factors as:

- Price
- Convenience
- Quality
- Competition
- Customer service
- Luxury

Positioning your brand is a helpful exercise to better develop a clear vision for your business and maximize relevance for your position in the market against your competitors. Read more on these strategies [here](#) and determine what works best for you and your business.

KNOW YOUR TARGET MARKET

Whether you are selling an original high-quality product or setting up a nonprofit organization, you will have a more authentic experience and loyal customer base if you actively consider your audience and target market.

The individuals who will be engaging with your business or organization will be key in propelling your business forward. They can be loyal customers who continue to stay with your brand, they can spread the word about your company through their friends or through social media, and they are key to understanding what issues you are trying to solve and can give you clues on how best to service them.
How do you get to know your target audience? Complete these three prompts to get a better understanding of who your target audience is.

1. When you came up with the idea of your business or organization, who did you think it would help?

_________________________________________________________________

2. What problems are you attempting to solve with your business or organization?

3. Describe the characteristics of your desired target customers (gender, education level, annual income, age range, etc.). In as much detail as possible, describe their interests, lifestyle, and other things they have in common.

Now that you have a better understanding of who is within your target market, ask yourself, **if you could create one perception of your company within your primary target market, what would it be? Why?** This can help later to better inform your branding strategy.

KNOW YOUR COMPETITORS

Now that you have identified your target audience, it is a helpful exercise to consider what your competitors are doing that may already be marketing toward your target audience. Knowing what you can provide that your competitors cannot is also a helpful way to position your brand.

List competitors you know for your business or organization. Whether they are local or are large corporations, write down the top 8 competitors you know for your company.

<td>8.</td>
</tr>
</tbody>
</table>

Let’s take a deeper look into these companies. Choose three of these competitors and list two to five of their strengths and weaknesses. Pay particular attention to the way they market and communicate their story to their target audience.

Consider the following:

1. **Market research**  
   Ask your employees or customers, “Who are they mentioning in relation to your business? Who are they associating with your business?”

2. **Google Maps**  
   Find competitors based on keywords and their location. Check if they have a website linked, social media accounts, hours of operation, reviews, rankings, etc.

3. **Google Trends**  
   See how often your competitors’ names and keywords are being searched on Google.

4. **Social Mention**  
   See how often competitors’ names are being searched on more than 100 social media sites.
## Competitor 1

When considering your competitors’ strengths and weaknesses, you should also consider your own, as well as your goals for where your business could go in the future.

Consider your own company or proposed company. What are your strengths and weaknesses?

TELLING YOUR BRAND STORY

The first step of a perfect pitch starts well before making a presentation, or even speaking to another person. First you must reflect on your goals, including identifying your brand story and deciding how to tell it. This section will help guide you on how to share your brand story.

Determine what you have to tell

Before you can tell your brand story, you have to decide what you want people to know. The prompts below will help you identify the important information for your story. The goal for this exercise is to answer each question as concisely as possible, so take your time and challenge yourself to limit your answers to a few sentences per section.
